Award Winning Light Bulbs
and Fixtures for Builders

By choosing Lighting for Tomorrow's award-winning energy efficient dimming lighting products, you can:

Increase Sales

Sell more homes with ENERGY STAR® qualified fixtures - they benefit the environment and save money. The average homeowner can save \$40 to \$200 per year, adding up to \$3,600 over a 30-year mortgage.

Demonstrate Leadership

Stand out as an efficient lighting expert.

Protect the Environment

Add value to an ENERGY STAR® home or earn a green home designation.

Offer Affordable, High-Quality Lighting Solutions

Advances in lamps, electronic ballasts, and fixtures have resulted in superior light quality, good color, and great light output. In fact, all of the fixtures featured in this brochure are dimmable. In addition, new flexibility in changing lamp wattages is now possible due to the GU-24 base type. You can now provide your customers with efficient, attractive lighting that meets all of their needs.

SCONCES

American Fluorescent-Genesis

The Genesis sconce truly marks a new beginning in eco friendly lighting products. In addition to be dimmable, it is designed for minimal manufacturing environmental impact and is recyclable.

Ivalo Lighting Company-Aliante

Aliante is a sleek nautical form, finished with meticulously formed corners framing a flat plane. The graceful slope of the open top compliments the form and accentuates the curved front and can be dimmed down to 1%.

CEILING-MOUNT

American Fluorescent-Portman

Its low profile flush-mount design makes this fixture ideal for many applications where space is limited but adequate illumination is required. This fixture is dimmable, allowing for simple control of desired light output.

Designers Fountain-Versa-LUX

Available in a beautiful matte nickel finish with a frosted diffuser, this unique linear pendant offers a perfect solution for controlled lighting applications such as over kitchen counters, islands and high intensity work areas.

REPLACEMENT LAMPS

Philips- Energy Saver Twister 20W Dimmable and Reflector Flood 16W Dimmable

Philips Energy Saver dimmable compact fluorescents feature soft white light with excellent dimming performance when used with many standard household dimmers. They dim to 10% of full light levels and are RoHS compliant. The electronics and tube design optimize life and dimming performance, while the low end dimming limit helps prevent flickering.
